SALES SERVICE

- **HAOSAITE**

HAOSAITE was established in 2004. The company is a high-tech & joint-stock enterprise covering 26000 m². Converged with development of scientific research, production operation, technique service as an integrate. We are an independent import and export rights' enterprise. The company is awarded Qingdao Profession Lean Speciality Innovation enterprise, Qingdao Private Technology enterprise, Qingdao High-tech enterprise.

- **PRODUCT**

The products include plastic machinery and products. We have passed ISO9001:2000 international quality system certification. We have new products developing trial plant. The plastic machinery covers series of pipe, board & sheet, profile, granulator crusher and so on referring 20 series 100 varieties.

- **MARKETING**

Our machines are exported to more than 20 countries such as Canada, Italy, Russia, Chile, Indonesia, Kazakhstan, Ukraine, Vietnam, India, Turkey. Providing most competitive products and perfect service after sales which get highly praise by domestic and abroad clients.

Outdoor PP PE WPC produce process

1.SRL-Z300 mixer

2. SJZ80/156 conical twin screw extruder

3.WPC production line

4.WPC production line

5. YFD 240 vacuum sizing

6. YFY240 haul off

We can provides serious of WPC extrusion line for customers.By changing the molds,the machine can make different profiles.

- 1.Plastic material,recycled pp/pe plastic
- 2.Wood material:wood powder from rice husk,straw,wheat husk/straw,wood sawdust, wastage wood.
- 3.Percentage of plastic 25-30%
- 4.Percentage of wood powder 50-70%
- 5.Final product WPC decking WPC wall cladding , WPC pergola profile,wpc fence profile, and other WPC construction profiles.

PP PE WPC Production Flow Chart

Indoor PVC WPC produce process

1.MF500 Miller machine

2.SJ80.156 double-screw extruder granulating machine

3.Sander machine

4.SRL-Z300.600 high speed cooling mixer machine

5.WPC wood crusher machine

6.SJ65.132 PVC wood plastic extrusion line

7.vacuum forming equipment

8.Haul-off equipment

9.WPC production line

10.Wood plastic profile Embossing machine

11.brushing machine

12.board products

PVC WPC produce process

We can provide serious of WPC extrusion line for customers. By changing the molds, the machine can make different profiles.

1. mixing recycled PP/PE plastic with 60% wood powder.
2. the wood powder can be made from wood sawdust, rice husk, rice straw, wheat straw.
3. The recycled PP/PE plastic is crushed and washed
4. The wood sawdust is cut into chipper, then pulverizer, dry, mix with the PP/PE plastic.
5. Under the chemical additives, PP PE parallel pelletizer, conical double screw extruder, then the product is sanding and brushing, embossing, final products.

WPC door panel production line

1.WPC door panel production line

2.SJSZ92/188 twin screw extruder

3.YFD 1250 YFD1250 vacuum calibration table

4.YFD 1250 YFD1250 vacuum calibration table

5. YFY1250 Rubber belt hauling-off machine

6. YFQ 1250 Cutting machine

Advantage

- 17 years' export experience
- No defective return
- 0 defect
- Create win-win
- Mature technique

Sincerely Cooperation

Customer's satisfaction

Delivery in time

Swift Logistic

Higher Quality
